

**National College Health
Assessment:
Tobacco Use 2009-2014**

Center for the Study of Student Life

August 2015

INTRODUCTION

The purpose of the study was to analyze tobacco use patterns from 2009-2014 at The Ohio State University, utilizing data from the National College Health Assessment (ACHA-NCHA II). Data were collected in 2009, 2012, and 2014. In 2009, 2,124 (21.2%) of recipients responded, in 2011 1,447 (14.5%) of recipients responded, and in 2014 1,034 (10.3%) of recipients responded.

HIGHLIGHTS

- In 2009, 63.1% of students reported never having used cigarettes, increasing to 73.7% in 2014.
- The percentage of female respondents who have never used cigarettes increased from 64.5% in 2009 to 77.6% in 2014; the percentage of male respondents who have never used cigarettes increased from 60.1% to 66.8%.
- In 2009, 64.7% of students reported never having used hookah, increasing to 68.3% in 2014.
- The percentage of undergraduates who have never used hookah increased from 61.1% in 2009 to 65.7% in 2014; the percentage of graduates who have never used hookah decreased from 76.8% to 75.2%.
- In 2009, 66.3% of students reported never having used cigars, little cigars, or clove cigarettes, increasing to 76.8% in 2014.
- The percentage of females who reported never having used cigars, little cigars, or clove cigarettes increased from 74.6% in 2009 to 84.8% in 2014; the percentage of males who reported never having used them increased from 53.3% to 61.9%.
- In 2009, 86.4% of students reported never having used smokeless tobacco, increasing to 88.6% in 2014.
- The percentage of females who have never used smokeless tobacco increased from 93.8% in 2009 to 94.7% in 2014; the percentage of males who have never used smokeless tobacco increased from 74.4% to 77.1%.

DEMOGRAPHICS
