INTRODUCTION

The Ohio State University Undergraduate and Master's/Professional Graduation Surveys were first administered in the Spring term of 2011 and are administered at the end of each term by the Office of Student Life. The surveys gather information about the experiences, satisfaction and career and education plans of graduating students, as well as their permanent contact information. This report covers the combined results for the 2022-2023 academic year and includes demographic information about students who were invited to take the surveys, as well as the survey-takers.

Design

The surveys were designed by representatives from the Registrar's Office, the Office of Institutional Research and Planning, the Office of Student Life, University Communications and the Alumni Association. Two surveys were developed - one for undergraduates and one for students earning Master's or professional degrees. Graduate students completing PhDs are not surveyed because PhD graduates are invited to take the Survey of Earned Doctorates, which duplicates many of the items on the Graduation Survey.

The surveys include the following sections: future contact information, students' satisfaction with Ohio State, students' immediate career plans, students' future education plans and the amount of debt incurred in pursuit of their degrees. In addition, students are asked questions about the curriculum and about their co-curricular experiences.

The future education items for the undergraduate survey were taken from the Association of American Universities Data Exchange (AAUDE) survey. For the Master's and professional students' survey, the AAUDE items were adapted to reflect appropriate language (for example, "major" or "minor" was changed to "field") and the dollar ranges for the item about debt were adjusted to reflect more likely ranges for Master's and professional students.

Over the past few years, the survey has undergone several revisions. Some items have been added or changed, and some response options have been edited to better reflect student perspectives.

Invitations and Response Rates

Students who applied to graduate were invited to take the appropriate survey. If students planned to graduate with more than one degree, they received only one invitation. If students planned to graduate with both an undergraduate and graduate degree in the same major, they were invited to take the Master's/Professional survey. Graduating students from all campuses were invited to take one of the two surveys.
