INTRODUCTION

The Ohio State University Undergraduate and Graduate/Professional Graduation Surveys were first administered in the Spring term of 2011 and are administered at the end of each term by the Office of Student Life. The surveys gather information about the experiences, satisfaction and career and education plans of graduating students, as well as their permanent contact information. This report covers the combined results for the 2023-2024 academic year and includes demographic information about students who were invited to take the surveys, as well as the survey-takers.

DESIGN

The surveys were designed by representatives from the Registrar's Office, the Office of Institutional Research and Planning, the Office of Student Life, University Communications and the Alumni Association. Two surveys were developed - one for undergraduates and one for students earning graduate or professional degrees.

The surveys include the following sections: future contact information, students' satisfaction with Ohio State, students' immediate career plans, students' future education plans and the amount of debt incurred in pursuit of their degrees. In addition, undergraduate students are asked questions about the curriculum and about their co-curricular experiences.

Over the past few years, the survey has undergone several revisions. Some items have been added or changed, and some response options have been edited to better reflect student perspectives.

INVITATIONS AND RESPONSE RATES

Students who applied to graduate were invited to take the appropriate survey. If students planned to graduate with more than one degree, they received only one invitation. If students planned to graduate with both an undergraduate and graduate degree in the same major, they were invited to take the graduate or professional survey. Graduating students from all campuses were invited to take one of the two surveys.
